GOODBYE!

I am happy for being your Newsletter editor for almost 2 years and now it is time to say goodbye. I hand over this nice task to Lorea & Aimable, who had willingly compromised to keep the Newsletter running. Thank you guys!

Tania

PUBLICATIONS

More animal welfare or more environmental protection?

Researchers at the University of Bonn are investigating conflicting goals in animal husbandry. Human health appears to be the most important priority

LET'S PLANT

Let's Plant e.V. is a German NGO which was founded in Bonn in 2018. The key aim of Let's Plant is to support the restoration of degraded land and the development of new functional agro-ecological systems through a holistic landscape management approach. By doing so, we want to create new socio-ecological systems that provide sustainable income conditions for people while at the same time increase biodiversity and other ecological functions.

*Students help planting the tree seedlings

Our current tree planting project is conducted in Bishoftu, Ethiopia where we were able to grow 10,000 seedlings in tree nurseries with the help of our local partners. Once they were big and old enough, the seedlings were planted out on a degraded area in mid-2021. Since then, they are growing and locals are helping with the watering and protection against game browsing. We are now accompanying the further sustainable growth process of the trees.

Another Look at your Day!

Furthermore, we are planning two new projects at the moment: one agro-forestry project in Debre Libanos, Ethiopia and one in Cochabamba, Bolivia. In Ethiopia, we want to help unemployed youth to establish tree nurseries to provide livelihood options. The raised saplings together with consultancy services can then be sold to smallholder farmers to establish agro-forestry systems. In Bolivia, we want to establish agro-forestry systems together with farmers and local administrative authorities.

Apart from actively planting trees, we are also involved in awareness-building activities. For example, Let's Plant hosts a yearly photo competition in the framework of the international conference Tropentag.

Do you share the same vision? Do you want to gain experience in implementing international reforestation projects? Let's Plant is looking for new members and people who want to help us on a voluntary basis to accomplish our aims. At the moment, we especially need assistance in our marketing and fundraising activities as well as in the development and management of the new project in Bolivia. If either of these is interesting for you or if you have ideas for other projects that you would like to implement, feel free to contact me, Dominik Suri (dominik.suri@lets-plant.org), or reach out to me if you see me on campus.
